

FUNCTIONAL FINISHES

FRAGRANCES

FRAGMA LAVENDER LIQUID

An encapsulated aromatic emulsion for printed and dyed fabric

FRAGMA MINT LIQUID

An epoxy silicon resin encapsulated aromatic emulsion for printing and finishing fabrics

FRAGMA LEMON LIQUID

An epoxy silicon resin encapsulated aromatic emulsion for printing and finishing fabrics

FRAGMA ROSE LIQUID

An epoxy silicon resin encapsulated aromatic emulsion for printing and finishing fabrics

UV ABSORBERS

FABSHIELD UV 100 LIQUID

An advanced ultraviolet light absorber. It is suitable for all kind of fibers

FABSHIELD UV 50 PLUS LIQUID

A special product for effective protection of the fabric from UV/IR radiation

DEPTH DEEPENERS

ZYLON UD LIQUID

A high molecular weight polymeric softener with colour deepening property

ZYLON UD SPECIAL LIQUID

A high molecular weight polymeric softener with colour deepening property

MOISTURE MANAGEMENT

SNOCOOL SRB LIQUID

A non ionic polymer solution which produces permanent cooling effect on treated fabric by effective moisture management

ROSWIK 14-H LIQUID

Wash fast superabsorbent that produces wick height as per international wicking norms of 15 cms. in 30 mins.

INOVASOF SRW N LIQUID

A premium permanent softener for soft, silky and bouncy feel

ANTIMICROBIALS

FABSHIELD AEM 5772-5 LIQUID

Antimicrobial to control the growth of microbes

MICROBAN PB80150-050

Broad spectrum antimicrobial liquid additive for cellulosic fibers, textiles and a range of articles and materials

MICROBAN R 11100-0

A cost effective polyamine binder and improves wash durability of antimicrobial finishing on textiles especially with cationic antimicrobials

FABSHIELD AEM 5700 LIQUID

Antimicrobial to control the growth of microbes

FABSHIELD AEM 5772 LIQUID

Concentrated antimicrobial to control the growth of microbes

FABSHIELD MF- ECO LIQUID

Antimicrobial finish for inhibiting growth of microbes on cellulosic substrates
