

TRIMIN LAY FORTE

**Trusted Inorganic
Trace Mineral Premix For Layer's**

TRIMIN LAY FORTE

Trusted Inorganic
Trace Mineral Premix For Layer's

Growing demand for high performance layers is accompanied by serious challenges for the farmer regarding eggshell quality and bone health posing a significant loss to the producers

Trimin Lay Forte is an updated scientifically balanced micro-mineral premix that satisfies the requirements of current day layer birds for optimum production, growth and bone stability.

TRIMIN LAY FORTE

Safe and reliable solution to consistently meet the requirement of micro-nutrients, leading to normal health, production and reproduction.

Mineral Composition

per Kg For Layer's

Mineral	Salt	Quantity
Mn	Manganese Sulphate Monohydrate	110.0 g
Zn	Zinc Sulphate Monohydrate	110.0 g
Fe	Ferrous Sulphate Anhydrous	80.0 g
Cu	Copper Sulphate Pentahydrate	20.0 g
I	Potassium Iodate	1.2 g
Se	Sodium Selenite	0.5 g

No Side Effects Observed

Key Features

- Formulated mainly from the 99% pure sulphate mineral salts having high bioavailability.
- Designed to meet all the micro mineral requirements of commercial poultry.
- Homogeneous mixing using specialized mixers.
- Regular screening of raw materials for heavy metal testing
- Consistency in performance has gained the TRUST & reliability within customers.

Key Role of Some Important Trace Minerals

- Zn = Egg production, Egg Shell Quality (Cofactor of Carbonic anhydrase) Collagen formation & Bone Groth
- Mn = Egg Shell Thickness Immunity & Reproductive Hormone Synthesis
- Cu = Enzyme co-factor catalyzing the cross-linking of collagen & elastin Egg shell strength
- Fe = Erythropoiesis Component of Cytochrome C
- Se = Biological antioxidant Improves Fertility

Inclusion Level:

Layer Birds = 1Kg / Tonne of Feed
OR as recommended by Nutritionist

Storage Stability:

Store in dry conditions, away from sunlight and temperature not exceeding 25°C

Shelf Life:

Best before 36 months from the month of manufacture

Packaging:

Available in 25 Kg Bag
