

A Rossari Multivitamin for Poultry

# NEUTRAVSOL<sup>TM</sup>

— A good start is priceless —

- Better Bioavailability ●
- Improved Palatability ●

# NEUTRAVSOL<sup>TM</sup>

Today's poultry production goes through tremendous stress on chickens starting from first day of their life. This makes them susceptible to immunosuppression, deficiency disorders and metabolic diseases. Besides, a good start ensures optimum return and uniformity. Hence, a balanced multivitamin is indispensable in poultry nutrition from its inception

**NEUTRAVSOL** protects birds from deficiency disorders, improves production parameters and compensates the losses in the vitamins which are generally encountered during feed processing, transportation, storage and as well by variation in feed composition and environmental conditions

## NUTRITIONAL VALUE PER ML

VITAMIN A	50000 IU
VITAMIN D <sub>3</sub>	5000 IU
